

# skiosk® Smart 'Vending'

Ticket purchases made easy

The brand new ticket vending machine combines all the benefits of modern ticketing and makes purchasing tickets child's play - regardless of whether making a cash or cashless payment. Relieve your cashiers and reduce the crowds and the waiting times for ticket purchases. Thanks to innovative and well thought-out functions, it will also be effectively integrated into your daily business as an advertising and information kiosk.

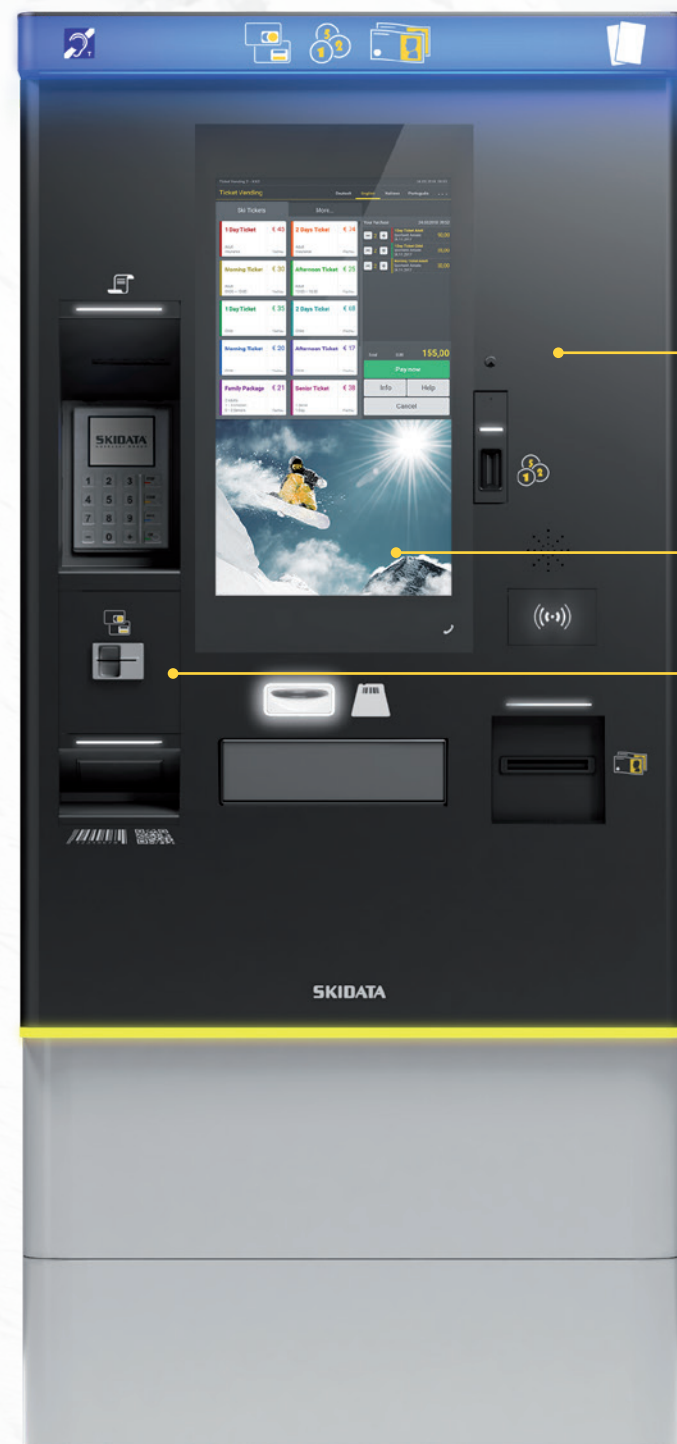

# All-in-1 multifunctional device

Flexibly adapted to your individual need:

- Ticket sales from keytix® flow
- Ticket loading of RFID data carriers
- Pick-up of advance sales tickets
- keycard® return (option)
- With or without cash system

## Large capacities

Optimally-designed fill capacities for approx. 1,850 RFID-tickets, additional 5,500 paper tickets, coins, banknotes, tickets, and receipt paper allows for continuous, low-maintenance operation.

## Now also cash payment possible

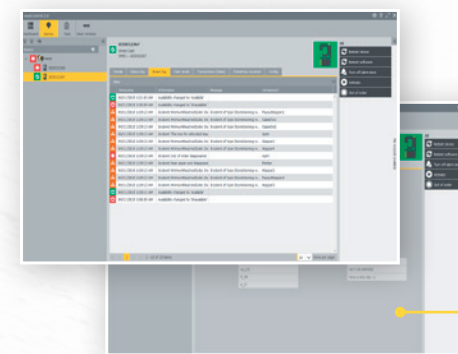

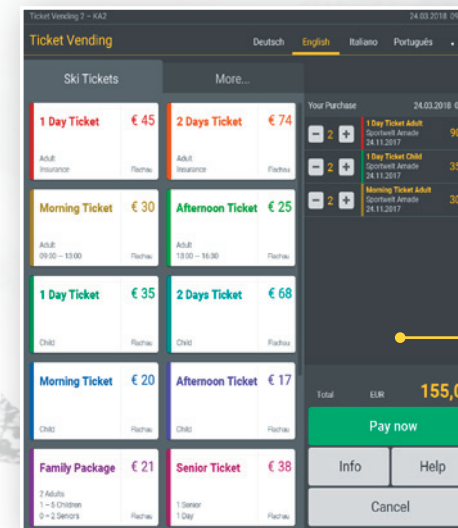

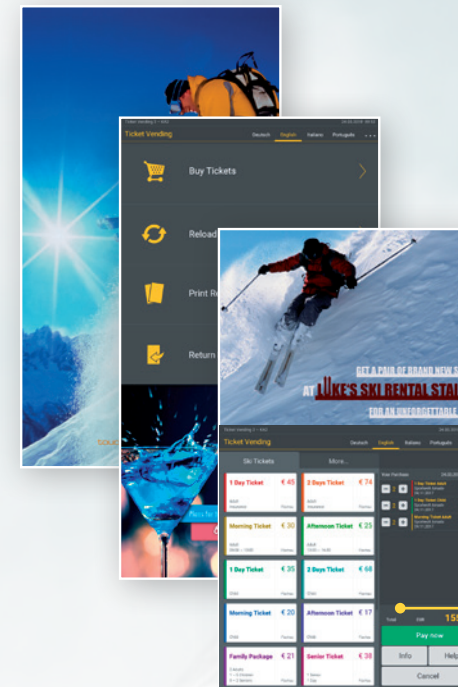

The flexible payment options provided by skiosk® Smart 'Vending' let customers pay using cash or with a card. With its ability to both accept and dispense in currency notes, optimal cash management and the pleasant surprise for your guests of receiving their change in the appropriate bill denominations is ensured.

## Flexible integration of third-party systems

Adapted to your requirements, the vending machine enables the integration of various third-party systems, e.g. additional cashless payment systems.

## Optimal expansion of sales points

- skiosk® Smart 'Vending' supports your staff at peak times
- Ticket purchase for your customers around the clock
- skiosk® Smart 'Vending' frees up personnel in periods and at locations with lower demand
- There is more time for building customer loyalty

## Easy handling with keytix® flow

The new RFID ticket keytix® flow enables a large ticket stock and reliable ticket issuance, while at the same time offering the convenience of contactless access.

## The 2-in-1 monitor as information and advertising wonder

- The large format 21.5" touchscreen in full HD resolution has a split-screen function that combines simple operation together with current information for your guests
- Generate additional revenue from countless advertising opportunities to help refinance your investment

## One-touch concept

- Operating concept available thanks to the new touchscreen technology
- The most frequently sold tickets are already predefined. With just one "touch" these are moved into the shopping cart

## State-of-the-art networked system

- Centralized control and monitoring reduces your maintenance effort
- Integrated reports and billing are handled by your SKIDATA software solution
- Offer your guests perfect service via the integrated intercom system

# Intelligent technology meets added economic value. Your benefits at a glance.

## Design quality both inside and out

Extra large, extra special: Features such as the full-surface touch function and the handy product overview on the 21.5 inch display take the user interface and ease of operation to a new level. Carefully selected materials enhance an appealing device design.

**Your benefit:** Intuitive concept for a high level of operating comfort, superior quality, robustness and excellent product life

## Reliability

SKIDATA Expert Services include all services offered by SKIDATA both for the operation of your system as well as for the decision-making and implementation phases.

**Your benefit:** With subsidiaries and numerous partners, SKIDATA is present in more than 100 countries. One of our strategically located service centers is also close to you.

## Profit enhancing multipurpose

The big 21.5 inch display offers the possibility to continuously send relevant marketing messages in split-screen and full-screen mode. It can be used for your own promotional purposes or can be sold to business partners as an attractive advertising space providing an additional source of income.

**Your benefit:** Establish and expand business partnerships to generate additional income

## Valuable safety aspects

Alarm signals, shock sensors, sophisticated ticketing and counterfeit-proof data carriers make the skiosk Smart 'Vending' your reliable business partner.

**Your benefit:** Revenues can be checked and tracked; Targeted prevention of theft and misuse through the use of high-quality materials and superior locking hierarchies

## Wide variety of payment options

The digital kiosk supports numerous methods of payment through the use of barcode and RFID readers as well as powerful coin and banknote systems.

**Your benefit:** A large selection of equipment options, in terms of both function and capacity, to meet your specific needs; also available without the coin system

## Extensive system networking

Control and monitoring are performed centrally. Comprehensive system networking ensures a high degree of serviceability.

**Your benefit:** A consolidated overview, the ability to manage proactively and to respond quickly to support and maintenance needs

## Low-maintenance operation

The larger and well-matched ticket, coin and banknote capacities minimize your maintenance operations and personnel requirements.

**Your benefit:** Lower operating expenses thanks to optimized personnel deployment

## Base heights

Choose from a variety of base options for user-friendly and handicap-accessible operating heights.

**Your benefit:** A selection to satisfy your needs as well as international standards
